## PROFILE

Aspiring software engineer passionate about technology and problem-solving. Familiar in React.js, Node.js, Java, Python, and JavaScript. Currently refining skills through academic work and personal projects, with a strong interest in web development. Eager to gain hands-on experience, contribute to impactful software solutions, and collaborate with others in a dynamic, growth-oriented environment.

## PROJECTS

- Attorney Management System

The Attorney Management System (AMS) is a web-based platform designed to streamline law firm operations. It includes case, document, appointment, deed, user, attorney, client portal, and finance management. Using the MERN stack, AMS enables efficient management, reduces manual tasks, and enhances communication between law firms, lawyers, and clients. Concepts and Architecture followed (OOP, MVC)

• MERN Stack

• HTML

• CSS
- Online Event Planning System

Our Event Planning System offers seamless event management for new users, customers, and admins. It includes easy account creation, event bookings, vendor selection, secure payments, feedback sharing, and admin control over categories, vendors, and payment validation, ensuring a smooth experience. Concepts and Architecture followed (OOP, MVC)

• Java

• JS

• HTML

• CSS
- Online Teacher Trainer

Online Teacher Trainer is a platform offering diverse courses for teachers and lecturers. Learners can register, browse, and purchase courses to enhance their skills. Lecturers can create and manage courses. Support is available for registration, payments, and technical issues.
